Google Scholar

Visit our guide at libguides.wmich.edu/impact to explore more resources for citation analysis and journal impact.
Google Scholar includes many more journals, including foreign language journals. It also includes things like books, conference papers, white papers and dissertations and thesis, so not all citations are scholarly journal articles.

Log into a Google Account and create a My Citations profile to generate a list of your citations in Google, including an h-index. This will also generate a public link to your profile which may be useful to include on professional websites.

If I click on the Cited by for Google and navigate to the last page I can see that there are 749 citations, which Google rounded to 750. Take caution that some of these may be duplicate versions of the same citation.
